EDUCATION

University Institute of Engineering and Technology, Panjab University
Bachelor of Engineering in Information Technology, CGPA 9.67 (Department Rank 1)
R.P. D.A.V. Public School, CBSE
Senior Secondary (96%) - School & City Topper, Matriculation (93.8%)

July 2023 – June 2027
Chandigarh
April 2020 – March 2023
Kurukshetra, Haryana

TECHNICAL SKILLS

Languages: C++, JavaScript, SQL, Python
Back End: Node.js, Express, REST APIs
Databases: MySQL, MongoDB, PostgreSQL
Tools & DevOps: Git, Docker, Redis, Firebase
Concepts: Data Structures & Algorithms, OOP, DBMS, OS, CN

EXPERIENCE

Menthosa Solutions **June 2025 – October 2025**
Software Developer Intern *Onsite*

- Worked on a scalable Ground Control Station (iDronam Enterprise) supporting 120+ clients and 600+ operators, ensuring reliable real-time communication for drone operations.
- Built a log replay analyzer to enable efficient debugging and post-flight analysis of drone missions.
- Designed and implemented a Dynamic Return-to-Launch (RTL) algorithm for real-time path recalculation, improving mission safety and reducing abort rates.
- Optimized session history retrieval through improved data structures and caching, demonstrating strong problem-solving skills and reducing lookup time.
- Enhanced operator workflow by adding a cursor-based camera controller and improving joystick control guidance.
- Built a smart flight plan generator using optimized perimeter mapping, reducing flight time.
- Integrated a real-time object detection pipeline using TensorFlow.js, enabling identification of vehicles from live drone feeds.

UIET, Panjab University **April 2025 – May 2025**
Web Development Intern *Link*

- Developed a web-application for Mundi Society by gathering feature requirements from key stakeholders, serving 250+ members under the guidance of Dr. Sukhvir Singh.

PROJECTS

Resume Parser – AI **November 2025**
FastAPI, Celery, Redis, PostgreSQL, Docker, Google Gemini, Tesseract OCR *GitHub*

- Built a distributed resume parsing system using FastAPI, Celery, and Redis with asynchronous task queues for scalable processing.
- Designed a structured AI pipeline using Gemini API with strict schema validation (Pydantic), ensuring consistent and reliable outputs.
- Containerized services using Docker, enabling easy deployment and environment consistency. Implemented OCR-based extraction for scanned resumes using Tesseract.

Himtechno Machine Tools India **June 2025**
HTML, CSS, Bootstrap, JavaScript, Formspre *Live*

- Developed a responsive company website with product catalog, interactive layouts, and a validated Formspre contact form.

TrueLens – Serve Smart Hackathon **January 2025**
Python, Keras, TF-IDF, SMOTE *GitHub*

- Built a binary text classification model with TF-IDF and a dense neural network, using SMOTE to address class imbalance.
- Achieved 98% accuracy, high F1-score, and ROC-AUC, demonstrating strong robustness and generalization.

ViaNest **April 2025**
Node.js, Express, MongoDB, EJS, Bootstrap *GitHub*

- Designed RESTful APIs and implemented CRUD with MongoDB, focusing on data consistency and efficient query handling.

AWARDS & ACHIEVEMENTS

ICPC - International Collegiate Programming Contest **January 2026**
• Achieved an **AIR 442** in the ICPC Prelims (online round) and secured **AIR 194** in the ICPC Amritapuri Regionals (onsite round).

Offline DSA Contest - By CodeInsight Technologies **March 2025**
Top 3 Rank *Panjab University*

E-Summit Hackathon - IIT Roorkee **February 2025**
Final Round Qualification *Roorkee, Uttarakhand*

Hackathon - IIT BHU **January 2025**
Among Top 15 Teams *Varanasi, Uttar Pradesh*

Coding Profiles

- **LeetCode:** Rating 1879 (Knight) | **Codeforces:** Rating 1100 | **CodeChef:** Rating 1503
